

A treatise on linear differential equations Volume 1

Filesize: 3.79 MB

Reviews

*This sort of ebook is every thing and made me hunting forward and a lot more. I have read through and i also am confident that i am going to going to go through once again once more in the foreseeable future. I discovered this publication from my dad and i encouraged this book to discover.

A TREATISE ON LINEAR DIFFERENTIAL EQUATIONS VOLUME 1

To download **A treatise on linear differential equations Volume 1** PDF, you should click the link beneath and download the ebook or have access to additional information which are have conjunction with **A TREATISE ON LINEAR DIFFERENTIAL EQUATIONS VOLUME 1** ebook.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 80 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: . . . of no other singular points than critical points and poles, it follows that it is an algebraic function of x . This being true for any integral, let z_1 and z_2 denote two integrals of (i); we have then the relation The product of any two integrals, $z_1 z_2$, is then an algebraic function of x . If z_1 and z_2 are two integrals, then z_1^2 and z_2^2 will also be two integrals. The product $z_1 z_2$ and consequently z_1^2 will be an algebraic function of the variable. Every closed path starting from and returning to a point A can be reduced to a series of loops described round the points $x = 0$ and $x = i$; we are therefore led to examine the behavior of the preceding ratio when we describe one of these loops. We will take for γ , and, the integrals 0 , and 0 ; then starting from a point A with the integral C_0 , $-f-C_0$, and describing the loop $x = 0$ in the direct sense, we shall, as we have seen above, return to A with the integral $\gamma, 0$ Cfa where Let p be the initial value of γ , and p its final value; then Making $r = i - ri - y$ this last formula becomes $A) p - a K(fl - a)$. If the loop were described in the negative sense we should have $(A) p - a (p - a)$. Now let the variable describe the positive loop around $x = i$; the integral C_0, C_p , changes into $C, 0, V_0 a \dots$
