Combined Assessment Program Review of the Lexington VA Medical Center, Lexington, Kentucky managers, attached to annual proficiency reports, and filed in the official personnel records. The implementation plans are acceptable, and we will follow up on the planned actions until they are completed. The purpose of this review was to evaluate whether VHA Medication facilities had adequate medication management practices. A Management safe medication management system includes medication ordering, administering, and monitoring. We reviewed selected medication management processes on the inpatient acute medical surgical, mental health, and intensive care units. We found adequate management of medications brought into the facility by patients or their families. Nurses appropriately scanned patient armbands and used personal identifiers to correctly identify patients prior to medication administration. Also, we found that reconciliation of controlled substances discrepancies at the unit level was adequate. We identified one area that needed improvement. Documentation of Pain Medication Effectiveness. We found that...
