CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 88 pages. Dimensions: 11.0in. x 8.5in. x 0.2in.The forward surgical team (FST) is a 20-man team which provides far forward surgical intervention to render nontransportable patients sufficiently stable to allow for medical evacuation to a Level III hospital (combat support hospital CSH). There are 57 patient condition codes (Appendix A) that identify patients with the type of injuries that would benefit most from FST intervention. Surgery performed by the FST is resuscitative surgery; additional surgery may be required at a supporting Level III hospital in the area of operations (AO). Patients remain at the FST until they recover from anesthesia, once stabilized they are evacuated as soon as possible. The postoperative intensive care capacity of the FST is extremely limited, there is no holding capability. The FST is not a self-sustaining unit and must be deployed with or attached to a medical company or hospital for support. Further, the FST is neither staffed nor equipped to provide routine sick call functions. This field manual (FM) outlines doctrine for the employment of the FST. It is the primary reference document for the Active Component (AC) and the Reserve Component (RC) of the Army. It presents tactics, techniques, and procedures for employing FSTs. It is primarily intended for the use of the FST chief, his team, and the medical companytroop commanders and their staff. Other intended users include senior medical commanders, senior medical staff advisors, and joint and Army health service support (HSS) planners. This item ships from La Vergne,TN. Paperback.
